

Nebraska Antimicrobial Stewardship Assessment and Promotion Program Pharmacist

Nebraska Medicine is offering an exciting opportunity for an Infectious Diseases (ID)-trained pharmacist to join the Nebraska ASAP (Antimicrobial Stewardship Assessment and Promotion) outreach program. This individual will work alongside the Pharmacist Program Coordinator, the ASAP Medical Directors, and the Nebraska DHHS Healthcare-Associated Infection and Antimicrobial Resistance (HAI/AR) program on statewide antimicrobial stewardship efforts.

Job duties will include:

- Participate in discussions with acute care hospitals, long-term care facilities, and outpatient clinics related to antimicrobial stewardship program structure and mitigation of gaps in CDC Core Elements
- Prepare and deliver presentations on antimicrobial stewardship to local, state, and national partners
- Assist in creating educational content and tailored guidance related to current initiatives on the [Nebraska ASAP website](#), [YouTube channel](#), social media, and the annual Nebraska Antimicrobial Stewardship Summit
- Recruit outpatient practices to participate in antibiotic use collaboratives with Nebraska DHHS
- Serve on the Antimicrobial Stewardship subcommittee of the multidisciplinary HAI advisory council to discuss ideas, issues, and initiatives that foster stewardship improvements across the state
- Review NHSN Antimicrobial Use and Resistance data to identify additional facilities needing assistance with Core Element implementation to promote appropriate utilization, surveillance, and governance of antimicrobial agents
- Regularly collaborate with the nationally recognized [Nebraska Medicine Antimicrobial Stewardship Program](#), an IDSA Antimicrobial Stewardship Center of Excellence, to keep up to date with best practices in antimicrobial stewardship
- If interested, obtain adjunct faculty status at the University of Nebraska Medical Center [College of Pharmacy](#)

A significant portion of functions can be accomplished remotely, but in-person meetings or clinical work may be required. This position is currently funded from year to year through federal grants. Ideal candidates will be formally trained and have significant experience in Infectious Diseases pharmacy practice. Public speaking, development of engaging educational content, and the ability to build strong relationships with stakeholders is essential. Interest in research and publication is strongly encouraged.

Required Qualifications:

- Minimum of five years clinical practice experience in the clinical specialty or an American Society of Health-System Pharmacists (ASHP)-accredited postgraduate year two residency in the specialty required.
- Graduate of an Accreditation Council for Pharmacy Education (ACPE) accredited Doctor of Pharmacy degree program OR possess a Bachelor or Master of pharmacy degree with 10 years of experience required.
- Licensed in the state of Nebraska or jurisdiction in which pharmacy practice is conducted upon start or transfer required.
- Basic Life Support (BLS) certification as deemed appropriate required, must be from an American Heart Association (AHA) endorsed program.

Preferred Qualifications:

- American Society of Health-System Pharmacists (ASHP) accredited postgraduate year one or year two residency as deemed appropriate and relevant to practice preferred.
- Board of Pharmaceutical Specialties (BPS) certification as deemed appropriate and relevant to practice preferred.
